

# ASSESSMENTS

Provide your learner with a measurement of success.

The experts at Learn on Demand Systems can ensure that your learner has acquired the appropriate skills by developing and embedding assessments within a lab. Drop assessments throughout a lab to provide a progressive gauge of success and determine topics to revisit. Administer an assessment at lab completion to measure the overall mastery of concepts.

## Here's what you'll get:

We will work with you and your SMEs to understand what you need to measure and how to incorporate a scoring logic. Assessments may be added to your proprietary labs or to a lab we build or have built for you.

Assessments may use automated scoring utilizing scripts or code or we can design assessments based on multiple-choice, true/ false, and yes/no scoring.
