

# COURSES

Train your staff or customers on your next robust product or service roll-out.

We can work with you to design an intense two- to three-day workshop or four- to five-day course composed of a series of hands-on labs addressing the concepts and functionality that are key for success.

## Here's what you'll get:

Collaborations with SMEs to establish design/specification document

Functional prototype of lab(s) presented to you to ensure we meet your objectives

Final lab that includes screenshots, explanations, and a completed quality check

A brief slide deck, that will provide an overview of the lab environment as well as the objectives that are addressed within the labs

Slide presentation crafted with your SMEs, to discuss the topic of the day and leverage the flow of your labs

An optional delivery guide detailing how an instructor would have success delivering the content

Student workbook, includes complete slide deck with room for notes
